Subject: Sustainable Energy Initiatives - IceCOLD®

Mike,

We are pleased to be able to recommend IceCOLD®.

Here at Hunter College, we have tested, during May –June 2009, IceCOLD® and found:

- 1) Increases the efficiency of Air Conditioning systems by 15-20%.
- 2) Reduces maintenance costs
- 3) Extends the life of equipment thereby reducing capital expenditures

We have seen, IceCOLD® deliver excellent results on our 10 ton Trane chiller. It has increased the efficiency of our system by over 20%. The unit is working less and cooling better and faster(documented). We will get a payback for our investment in less than 11 months!

We have requested funds to treat all of our units with IceCOLD®.
IceCOLD® will save energy and help us reduce our carbon footprint.

Sincerely,

Patrick Tobin 
Administrative Superintendent
